Text Cleaning Lowercasing Removing Special Characters - Coding Assignment Assignment:
Write a Python function to clean a given text by removing special characters and converting it to
lowercase. Test it with the input: 'Hello, World! Welcome to NLP 101.'

In [1]: ▶|
```python
import re

def clean_text(text):
    text = text.lower()
    text = re.sub(r'[^a-z0-9\s]', '', text)
    return text
input_text = 'Hello, World! Welcome to NLP 101.'
cleaned_text = clean_text(input_text)
print("Cleaned Text:", cleaned_text)
```

Cleaned Text: hello world welcome to nlp 101
