Write a Python program to calculate the sum of all even numbers between 1 and a given positive integer n.

In [1]:

```python
n = int(input("enter the n value: "))
numbers = 0
for i in range(1,n+1):
    if(i % 2 == 0):
        numbers += i
print(" the sum of the numbers from 1 to ", n, "is: ", numbers)
```

```
enter the n value: 56
 the sum of the numbers from 1 to  56 is:  812
```
